## Granular Calcium Chloride 94%

Calcium chloride is used in concrete mixtures to speed up their setting time. It is also used in swimming pool water as a pH buffer and to adjust water hardness. Calcium chloride is also used as an additive in plastics, in fire extinguishers and in water purification. In the petroleum industry, it is used to increase the density of solids-free brines. Additionally, it is used as a food additive as a sequestrant and firming agent.

### SPECIFICATIONS

| PARAMETER             | VALUE          |
|-----------------------|----------------|
| Purity                | 94.0 % MIN     |
| Humidity              | 4.0 % MAX      |
| Magnesium (Mg)        | 5.0 % MAX      |
| Other impurities      | 0.4 % MAX      |
| Specific weight(25°C) | 2.15           |
| Chlorides (Cl)        | 105 ppm MAX    |
| Physical state        | Solid granules |
| Color                 | White          |
| Odor                  | Odorless       |
