

Calcium Hydroxide 90%

One of the main applications of calcium hydroxide is to raise the pH of different products in a wide variety of industrial sectors. It is also used in the treatment of waste and drinking water, neutralizing the acidity of the water and purifying it, eliminating impurities. In other applications, it is used in the food, metallurgical, chemical, paper, and agricultural industries, among other sectors, which involve the production of magnesium, salt, fertilizers, and many other products.
