

Trichloroisocyanuric Acid

Trichloroisocyanuric acid (TCCA) can be used in water treatment, especially in the treatment of swimming pool water, drinking water, elimination of algae in industrial circulation water, wastewater, industrial or city water, among others. Chlorine loss during the day is reduced, since TCCA is stable.

SPECIFICATIONS

PARAMETER	VALUE
Available chlorine	90.0 % MIN
Humidity	0.5 % MAX
pH	2.5 - 3.7
Solubility (25° C)	1.2 g / 100 ml H ₂ O
Apparent density	0.99 g / ml
Granulometry (2 mm)	2.0 % MAX
Physical state	Solid granules
Color	White
Odor	Chlorine
