

**SAFETY DATA SHEET**  
According to 29 CFR 1910.1200

**BORAX DECAHYDRATE**

P405: Store locked up.

P501 Dispose of contents/container in accordance with local/regional/national/international regulations.

Emergency overview: Borax pentahydrate is a white odorless, powdered substance that is not flammable, combustible, or explosive, and has low acute oral and dermal toxicity.

Potential health effects: Inhalation is the most significant route of exposure in occupational and other settings. Dermal exposure is not usually a concern because borax pentahydrate is poorly absorbed through intact skin.

Inhalation: Occasional mild irritation effects to nose and throat may occur from inhalation of borax pentahydrate dusts at levels higher than 10 mg/m<sup>3</sup>.

Eye contact: Borax pentahydrate is a serious eye irritant.

Skin contact: Borax pentahydrate does not cause irritation to intact skin.

Ingestion: Products containing borax pentahydrate are not intended for ingestion. Borax pentahydrate has low acute toxicity. Small amounts (e.g. a teaspoonful) swallowed accidentally are not likely to cause effects; swallowing amounts larger than that may cause gastrointestinal symptoms.

Reproductive/Developmental: Animal ingestion studies in several species, at high doses, indicate that borates cause reproductive and developmental effects. A human study of occupational exposure to borate dust showed no adverse effect on reproduction. A recent epidemiological study and a peer reviewing report of the past epidemiological studies conducted in China didn't show any negative effect of boron on human fertility (10, 11).

Potential ecological effects: Large amounts of borax pentahydrate can be harmful to plants and other species. Therefore, releases to the environment should be minimized.

Signs and symptoms of exposure: Symptoms of accidental over-exposure to borax pentahydrate have been associated with ingestion or absorption through large areas of damaged skin. These may include nausea, vomiting, and diarrhea, with delayed effects of skin redness and peeling (see section 11).

**2.3. Other hazards**

**2.4 Unknown acute toxicity (GHS-US)**

Not applicable.

**SECTION 3.- COMPOSICION / INFORMATION OF INGREDIENTS**

**3.1 Substance**

**Substance type** The product contains greater than 99.9 percent (%) borax pentahydrate Na<sub>2</sub>B<sub>4</sub>O<sub>7</sub>·5H<sub>2</sub>O

<b>Name</b>	<b>Product identifier</b>	<b>%</b>	<b>GHS-US classification</b>
Borax decahydrate	(CAS No.) 1303-96-4	> 99.9	H360; H319

**3.2 Mixture** Not applicable.

**SECTION 4.- FIRST AID MEASURE**

**4.1. Description of first air measure**

**First-aid measures general** Never give anything by mouth to an unconscious person. If you feel unwell, seek medical advice.

**First-aid measures after eye contact** Use eye wash fountain or fresh water to cleanse eye. If irritation persists for more than 30 minutes, seek medical attention.

**First-aid measures after skin contact** No treatment necessary because non-irritating.

## SAFETY DATA SHEET

According to 29 CFR 1910.1200

# BORAX DECAHYDRATE

### First-aid measures after inhalation

If symptoms such as nose or throat irritation are observed, remove to fresh air.

### First-aid measures after ingestion

If large amounts are swallowed (i.e. more than one teaspoon), give two glasses of water or milk to drink and seek medical attention.

### 4.2. Most important symptoms and effects, both acute and delayed

Symptoms/injuries after inhalation N.A. (Not Applicable)

Symptoms/injuries after skin contact N.A.

Symptoms/injuries after eye contact N.A.

Symptoms/injuries after ingestion N.A.

Chronic symptoms N.A.

### 4.3. Indications of any immediate medical attention and special treatment needed

Observation only is required for adult ingestion of less than 7 grams of borax pentahydrate. For ingestion in excess of 7 grams, maintain adequate kidney function and force fluids. Gastric lavage is recommended for symptomatic patients only. Hemodialysis should be reserved for massive acute ingestion or patients with renal failure. Boron analyses of urine or blood are only useful for documenting exposure and should not be used to evaluate severity of poisoning or to guide treatment[1] (see section 11).

## SECTION 5.- FIREFIGHTING MEASURES

### 5.1. Extinguishing media

Any fire extinguishing media may be used on nearby fires.

### 5.2. Special hazard arising from the substance or mixture

None. Borax pentahydrate is not flammable, combustible or explosive. The product is itself a flame retardant.

### 5.3. Advice for firefighters

N.A. |

## SECTION 6.- ACCIDENTAL RELEASE MEASURES

### 6.1. Personal precautions, protective equipment and emergency procedures

#### 6.1.1. For non-emergency personnel

Avoid dust formation. In case of exposure to high level of airborne dust, wear a personal respirator in compliance with national legislation.

### 6.2. Environmental precautions

Borax pentahydrate is a water-soluble white powder that may, at high concentrations cause damage to trees or vegetation by root absorption (see section 12).

### 6.3. Methods and material for containment and cleaning up.

**Land spill** Vacuum, shovel or sweep up borax pentahydrate and place in containers for disposal in accordance with applicable local regulations. Avoid contamination of water bodies during clean up and disposal. No personal protective equipment is needed to clean up land spills.

**Water spill** affected water should be used for irrigation or for the abstraction of potable water until natural dilution returns the boron value to its normal environmental background level (see sections 12, 13 and 15).

### 6.4 Reference to other sections

**SAFETY DATA SHEET**  
According to 29 CFR 1910.1200

<b>BORAX DECAHYDRATE</b>
--------------------------

See Sections 8 and 13 for further information.

**SECTION 7.- HANDLING AND STORAGE**

**7.1. Precautions for safe handling**

To maintain package integrity and to minimize caking of the product, bags should be handled on a first-in first out basis. Good housekeeping procedures should be followed to minimize dust generation and accumulation. Your supplier can advise you on safe handling, please contact the supplier.

**7.2. Conditions for safe storage, including any incompatibilities**

No special handling precautions are required, but dry, indoor storage is recommended. No specific requirements. Provide appropriate ventilation and store bags such as to prevent any accidental damage.

**7.3 Specific end use(s)** The product should be kept away from strong reducing agents. See exposure scenario in Annex to the MSDS.

**SECTION 8.- EXPOSURE CONTROLS/PERSONAL PROTECTION**

**8.1. Control parameters**

Name	ACGIH TLV	OSHA PEL	NIOSH IDLH
Borax decahydrate 1303-96-4	10 mg/m <sup>3</sup>	10 mg/m <sup>3</sup>	Not available

**8.2. Exposure controls**

<b>Hygiene measures</b>	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
<b>Eyes and hand protection</b>	Goggles and gloves are not required for normal industrial exposures, but may be warranted if environment is excessively dusty.
<b>Respiratory protection</b>	Where airborne concentrations are expected to exceed exposure limits, respirators should be used.
<b>Other information</b>	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

**SECTION 9.- PHYSICAL AND CHEMICAL PROPERTIES**

**9.1 Information on basic physical and chemical properties**

<b>Physical state:</b>	Solid.	<b>Appearance:</b>	crystalline solid, white
<b>Odor:</b>	Odorless.	<b>Color:</b>	White.
<b>Molecular mass</b>			291.35 g/mol
<b>Odor threshold</b>			N.A.
<b>pH</b>			9.2
<b>pH solution</b>			1% solution (20 °C)
<b>Relative evaporation rate (butyl acetate=1)</b>			No data available.
<b>Melting/Freezing point</b>			741 °C
<b>Boiling point</b>			1575 °C

**SAFETY DATA SHEET**  
According to 29 CFR 1910.1200

**BORAX DECAHYDRATE**

Flash point	Non flammable
Self ignition temperature	No data available.
Decomposition temperature	320 °C
Flammability (solid, gas)	No data available.
Vapor pressure	Negligible @ 20°C
Relative vapor density at 20°C	No data available.
Relative density	1.72 @ 20°C
Solubility	3.7% @ 20°C; 51.2% @ 100°C
Log Pow	No data available.
Log Kow	No data available.
Viscosity, kinematic	No data available.
Viscosity, dynamic	No data available.
Explosive properties	Non explosive.
Oxidizing properties	No data available.
Explosive limits	No data available.

**9.2 Other information**

No additional information available.

**SECTION 10.- STABILITY AND REACTIVITY**

<b>10.1 Reactivity</b>	Non-reactive
<b>10.2 Chemical stability</b>	Borax pentahydrate is a stable product, but when heated it losses water, eventually forming anhydrous borax (Na <sub>2</sub> B <sub>4</sub> O <sub>7</sub> ).
<b>10.3 Possibility of hazardous reactions</b>	Reaction with strong reducing agents such as metal hydrides, acetic anhydride or alkali metals will generate hydrogen gas which could create an explosive hazard.
<b>10.4 Conditions to avoid</b>	N.A.
<b>10.5 Incompatible materials</b>	Avoid contact with strong reducing agents such as metal hydrides, acetic anhydride or alkali metals.
<b>10.6 Hazardous decomposition products</b>	N.A.

**SECTION 11.-TOXICOLOGICAL INFORMATION**

**11. 1. Information on toxicological effects**

Acute toxicity Not classified.

Name	LD <sub>50</sub> oral	LD <sub>50</sub> dermal	LC <sub>50</sub> inhalation
Borax pentahydrate	3,200 to 3,500 mg/kg (rat)	> 2,000 mg/kg (rabbit)	-

Skin corrosion/irritation	No known significant effects or critical hazards.
Serious eye damage/irritation	Borax pentahydrate is a serious eye irritant.
Respiratory or skin sensitization	N.A.

## SAFETY DATA SHEET

According to 29 CFR 1910.1200

# BORAX DECAHYDRATE

Germ cell mutagenicity	N.A.
Carcinogenicity	N.A. Animal feeding studies in rat, mouse and dog, at high doses, have demonstrated effects on fertility and testes. Studies with the chemically related boric acid in rat, mouse and rabbit, at high doses, demonstrate developmental effects on the fetus including fetal weight loss and minor skeletal variations. The doses administered were many times in excess of those which humans would normally be exposed to. Human epidemiological studies show no increase in pulmonary disease in occupational populations with chronic exposures to sodium borate dust. A recent epidemiology study under the conditions of normal occupational exposure to borate dusts indicated no effect on fertility.
Reproductive toxicity	
Specific target toxicity (single exposure)	N.A.
Specific target toxicity (repeat exposure)	N.A.
Aspiration hazard	Low acute inhalation toxicity; LC <sub>50</sub> in rats is greater than 2.0 mg/l (or g/m <sup>3</sup> ).
Potential adverse human health effects and symptoms	N.A.

### SECTION 12. ECOLOGICAL INFORMATION

#### 12.1 Toxicity

##### Phytotoxicity

Boron is an essential micronutrient for healthy growth of plants; however, it can be harmful to boron sensitive plants in higher quantities. Care should be taken to minimize the amount of borate product released to the environment.

##### Algal toxicity

Green algae, *Pseudokirchneriella subcapitata* (Hansveit and Oldersma, 2000)

72-hr EC<sub>50</sub> –biomass = 40 mg B/L, or 229 mg boric acid/L.

##### Invertebrate toxicity

Daphnia, Daphnids, *Daphnia magna* (Gersich, 1984a)

48-hr LC<sub>50</sub> = 133 mg B/L or 760 mg boric acid/L or 619 mg disodium tetraborate, anhydrous/L

##### Fish toxicity

Fish, Fathead minnow, *Pimephales promelas* (Soucek et al., 2010)

96-hr LC<sub>50</sub> = 79.7 mg B/L or 456 mg boric acid/L or 370 mg disodium tetraborate, anhydrous

#### 12.2 Persistence and degradability

Boron is naturally occurring and ubiquitous in the environment. Borax pentahydrate decomposes in the environment to natural borate.

#### 12.3 Bioaccumulative potential

Not significantly bioaccumulative.

#### 12.4 Mobility in soil

The product is soluble in water and is leachable through normal soil.

#### 12.5 Other adverse effects

Other information                      No data available

### SECTION 13.- DISPOSAL CONSIDERATIONS

#### 13.1. Waste treatment methods

Small quantities of borax pentahydrate can usually be disposed of at landfill sites. No special disposal treatment is required, but local authorities should be consulted about any specific local requirements. Tonnage quantities of product are not recommended to be sent

**SAFETY DATA SHEET**  
According to 29 CFR 1910.1200

**BORAX DECAHYDRATE**

to landfills. Such product should, if possible, be used for an appropriate application.

**SECTION 14.- TRANSPORT INFORMATION**

Borax pentahydrate has no UN Number, and is not regulated under international rail, road, water or air transport regulations.

<b>14.1. UN number</b>	Not regulated.
<b>14.2. UN proper shipping name</b>	Not regulated.
<b>14.3. Additional information</b>	
Other information	Not regulated.
Overland transport	Not regulated.
Transport by sea	Not regulated.
Air transport	Not regulated.

**SECTION 15.- REGULATORY INFORMATION**

**15.1 Safety, health and environmental regulations / legislation specific for the substance**

It should be noted that borates are safe under conditions of normal handling and use, besides, they are essential nutrients to plants, and research shows that they play a beneficial role in human health. CLP classification has been solely based on animal tests where animals were exposed to high doses of boric acid over long periods of time. These doses were many times higher than humans are exposed to under conditions of normal handling and use. Consequently, a precautionary decision was taken by the European Commission. Although we will comply with the body of legislation triggered by that decision, we are in process of all possible legal actions.

**Clean Air Act (Montreal Protocol)**

Borax pentahydrate was not manufactured with and does not contain any Class I or Class II ozone depleting substances.

**Chemical inventory listing**

- U.S. EPA TSCA Inventory 1330-43-4
- Canadian DSL 1330-43-4
- EINECS 215-540-4
- South Korea 1-760
- Japanese MITI (1)-69

Ensure all national/local regulations are observed.

**EU Reach Regulation**

Disodium Tetraborates are listed in the Candidate List of Substances of Very High Concern "SVHC" for eventual inclusion in Annex XIV to REACH Regulation 1907/2006 ("Authorization List"). (18.06.2010-ED/30/2010).

Disodium tetraborates are listed in the Annex XVII of REACH Regulation 1907/2006 (EU No.109/2012) and their use in consumer products above specific concentration limits are restricted. Note that this restriction is only specific to consumer products and do not cover their industrial and/or professional applications. Disodium tetraborates can be used in consumer products below specific concentration limits (which is C ≥6.5% for Borax Pentahydrate).

**15.2. Chemical safety assessment**

Chemical Safety Assessment of Borax Pentahydrate (disodium tetraborate pentahydrate) has been carried out under REACH Regulation of the EU.

**SECTION 16.- OTHER INFORMATION**

<b>NFPA</b>	NFPA health hazard	1	NFPA fire hazard	0	NFPA instability hazard	0	NFPA Special hazard	-
